DIPEN GADA

## SUMPTUOUS SURFACES IN A SPACIOUS PENTHOUSE @RAJKOT

Dipen Gada says, "This beautiful terrace is a part of one huge pent house in Rajkot. It is the dream house of the client. He has fantasy of huge and open spaces. We have carved out many such spaces in this royal penthouse at the 11th floor. This terrace is having east facade opening and they get beautiful and mesmerizing sunrise everyday from here. Evenings are very beautiful and breezy.

We have tried to play with monochromic materials and placed nice outdoor furniture which is adding beauty and comfort to this entire space. The flooring is **burnt steel grey granite with herringbone pattern** engraved out of it. The same effect is been carved out on the wall with the help of **cement sheet**.

That is creating nice drama in the entire space. This space is attached to family room at the same level and home theatre at the upper level. The wall fixtures on the cement sheet wall creates nice ambience during night. This is the space where one can relax with peace of mind and luxury of space."
